GOLDFLAME HONEYSUCKLE

TRADE MARK

A superlative variety; beautiful, hardy and versatile. The large flame-coral trumpets lined with gold, fragrant after nightfall, appear in immense, showy clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it nevertheless flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers.

Allowed to grow naturally, GOLDFLAME will climb a trellis or spread as a ground cover; if pruned it becomes a striking specimen shrub, while if planted in a row and sheared it gives a smashing effect as an everblooming hedge.

EVERGREENS

The name WILLIS has become synonymous with Quality in evergreens and there is very good reason for it:

A crew of trained men spends all its time in our evergreens, shearing and pruning with skilled hands to insure compactness and symmetry. No diseases or insect pests are permitted a foothold in our trees and no weeds, noxious or otherwise, will be found in our evergreen blocks. We would like to have you come and see for yourself.

Transplanted stock, field grown, dug fresh as ordered.
Prices include baling and burlapping.

Evergreens selected personally in the field by the purchaser will be invoiced at 20% above published prices

ROSES

NOTE: We are now offering both California-grown and southern-grown roses. When ordering please state which you prefer.

Rose growing is one of our specialties. We produce large quantities in wide assortment. With the exception of a few of the common climbers, all of our southern-grown roses are low budded on multiflora japonica, while our California-grown roses are low-budded on ragged-robin understocks. The roots of these understocks are fibrous and pliable and adapted to most types of soil. Our method of propagating produces symmetrical well balanced plants with short shanks suitable either for pot or garden culture. All of our roses are graded carefully according to the standards of the American Association of Nurserymen.

Look over this list and note the fine assortment offered.

TEA AND HYBRID TEA ROSES

These are the so-called Everblooming Roses. Bloom more or less regularly throughout the summer. Require protection in the northern states.

FLORIBUNDA ROSES

California-grown

This is a new classification that includes roses selected for their hardiness, ease of culture and for their mass color effect. In the group are found single, semi-double and double flowers, usually produced in large clusters. The Floribunda varieties are primarily intended for bedding, massing or for borders for which purpose they are far superior to annuals or herbaceous material.

PARADISE ASPARAGUS

(Introducers' description)

Sensational NEW, early maturing variety. Produces normal crop ONE YEAR EARLIER than other varieties and produces heavier throughout its life. Large, crisp, tender stalks with exceptionally fine, mild flavor. Only six or eight stalks required to the pound. Ideally suited for freezing, the superior taste being retained after freezing for the market. Is as strongly rust resistant as the Martha Washington variety. A new, better variety that will take the country by storm. An excellent variety for home gardens, commercial growers and shippers.

De La Mare Garden Books

De La Mare Garden Books are practical, concise and authentic gardening aids. Specialization in horticultural printing and publication of a horticultural trade paper for over fifty years provides a staff well trained in this work and offers an excellent selection of horticultural writers of proven ability and recognized merit from acquaintances in the horticultural world.

1001 GARDEN QUESTIONS ANSWERED

By Alfred C. Hottes
330 pages. 116 illus. \$2.00

A complete manual for the amateur gardener, presented in question and answer form. Thoroughly indexed so that a ready answer may be found to any of the many questions confronting the amateur wishing to plan and manage his own home grounds.

THE BOOK OF TREES

By Alfred C. Hottes
448 pages. 200 illus. \$3.50

An all-around handbook for the tree lover and tree planter. There are chapters on trees important in American history, on favorite tree poems, on street trees, on roadside trees, on nut trees, etc. Transplanting, pruning and propagation are covered and a variety of helpful lists for various purposes are given.

GARDEN GUIDE

By 28 Authorities
576 pages. Over 300 illus. \$2.00

One of the most practical and informative Garden Books ever published for the average home owner. Every phase of gardening in connection with the home grounds is covered—from the location of the house to the final reaping of the gardener's reward in perfect flowers, fruits, vegetables, a fine lawn, shrubs and trees. Its pages also include every related subject the gardener should be informed upon: insects, diseases, bees, birds, fish, etc.

PLANT PROPAGATION

By Alfred C. Hottes
238 pages. 136 illus. \$2.00

All amateurs have an intense desire to multiply desirable plants. In this book the whole subject is covered, whether seeds, buds, bulbs, grafts or cuttings are discussed.

AMERICAN ORCHID CULTURE

By Prof. Edward A. White
260 pages. 110 illus. 14 color plates. \$5.00

An authentic book on orchid culture for amateurs and professionals. Many years of observation, wide travel, actual growing experience and much association with orchid growers, both here and abroad, are back of this work.

PRACTICAL LAWN CARE

By Mortimer G. Merritt
32 pages. illus. 75c.

Gives all the essential information for making a new lawn or the renovation of an old one, plus ways and means for keeping lawns in good condition.

COMMON SENSE in the ROCK GARDEN

By James H. Bissland
218 pages. 62 illus. \$2.50

Written by a practical man for practical people. It stresses simplicity in design and construction and shows how to select and arrange plant material for the most telling effect; how to build and plant for permanency.

De La Mare

TROPICAL FISH—THEIR BREEDING AND CARE

By Edwin H. Perkins

152 pages.

53 illus.

\$1.50

Luck plays no part in Tropical management, many factors contributing to one's success after the start is made, and the author, one of the greatest authorities on Tropical Fish keeping in the United States, covers the subject most thoroughly for the budding aquarist.

THE ART OF HOME LANDSCAPE

By M. E. Bottomley

276 pages

65 sketches.

\$3.50

Develops good taste in gardening. Balances the practices with the principles of landscape design, showing how to use plants as well as how to grow them.

TUBEROUS ROOTED BEGONIAS—AND THEIR CULTURE

By George Otten

84 pages

36 illus.

\$1.25

The only book devoted to this subject. Gives the details of general culture, propagation and hybridization, and makes the first attempt to classify the single flowering and double flowering varieties.

GARDENS IN GLASS

By Mildred N. Andrews

120 pages.

30 illus.

\$1.50

A highly fascinating volume on the art of terrarium building. How to plan and plant . . . animals in the terrarium . . . style of containers . . . the history of terrariums . . . the care of terrariums—all are covered and amply illustrated.

WATER GARDENS AND GOLDFISH

By Robert V. Sawyer and Edwin H. Perkins

272 pages.

126 illus.

\$2.00

This book will answer many questions for the amateur about the making of Lily pools, the plants to grow in them and the fish that swim in their waters.

SUCCESS WITH HOUSE PLANTS

By Jane Leslie Kift and Karl N. Hedenberg

80 pages.

29 illus.

75c.

Suggests desirable plants for any window exposure and tells how to take care of them. If the housewife is an especially busy one, information is given about plants which are willing to grow with very little attention.

BOOK OF PERENNIALS

By Alfred C. Hottes

280 pages.

103 illus.

\$2.00

Among amateur gardeners there is a decided preference for perennial plants, largely because they require but little care and so generously reward even that little. For those desiring a continuous show of color from early Spring to early frost in their gardens, this book will be extremely valuable, discussing over 125 separate species individually, with their culture and requirements.

BOOK OF SHRUBS

By Alfred C. Hottes

448 pages.

190 illus.

\$3.00

Appeals to every home owner, plantsman, student and landscape architect, and is a mine of information on everything relating to these woody perennials as grown in all sections of the country. Numerous lists of different shrubs for different purposes and full details of care and culture are given.

BOOK OF ANNUALS

By Alfred C. Hottes

180 pages.

158 illus.

\$1.50

The author opens up many new possibilities to garden makers in this book, which is exceedingly complete, and all in all is a most useful manual dealing with annual flowers. With annuals alone almost every kind of effect can be secured, while the combinations of flowers which are made possible by a little study are most alluring. Over 100 separate species of annuals are described, with full directions for their culture and uses.

PRINCIPLES OF FLOWER ARRANGEMENT

By Prof. Edward A. White

202 pages. 67 illus. Four 4-color plates. \$3.00

In a class by itself—the one scholarly work on the subject, which accurately considers every problem of color, line, design or style. Illustrated with excellent halftones of prize winning compositions by garden club exhibitors and from photographs of arrangements made by some of the best flower artists in America.

Garden Books

LANDSCAPING THE SMALL HOME

By Edward W. Oliver

160 pages. 90 illus. \$1.00

For the owner of the average city or suburban lot, ranging from 40x120 ft. to 75x150 ft., teaching him how to plan and execute a planting economically and correctly.

ALL ABOUT FLOWERING BULBS

By T. A. Weston

184 pages. 68 illus.

Eight full page color plates \$2.00

All that one needs to know about the planting and care of some 80 families of bulbs. An amazing amount of information is given about Spring flowering, Summer flowering and tender bulbs.

OUR NATIVE CACTI

By Ethel Bailey Higgins

182 pages. 94 illus. Four 4-color plates. \$2.50

Gives descriptions of most of the plants that are likely to fall into the hands of the amateur. In addition, the author has managed to tuck in here and there interesting bits of folk lore, local history and entertaining anecdotes that serve to fix the facts about the plants more firmly in the reader's mind.

MODERN DAHLIA CULTURE

By W. H. Waite

134 pages. 24 illus. Six color plates. \$1.50

Written to meet the needs of the novice and to interest and inform the expert. Gives classification, culture, propagation, insects, diseases and remedies, shipping, packing, storing, soils, fertilizers, exhibiting at shows, etc.

ROCK GARDEN PRIMER

By Archie Thornton

152 pages. 70 illus. Six color plates. \$2.00

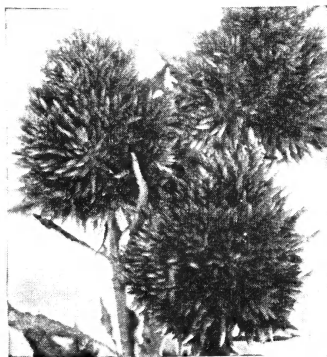

The object of a rock garden is to furnish suitable conditions for rock plants rather than a pile of stones to be covered with unsuitable plants that would thrive much better elsewhere. This volume is well worth reading before attempting to lay out a garden of this kind.

GARDENING IN THE SOUTH

By George R. Briggs

232 pages. 91 illus. \$2.00

The first book devoted specifically to the beautifying of home grounds in the Upper and Middle South.

FLOWERS OF THE WILD

By Frank C. Pellett

170 pages. 100 illus. Four 4-color plates. \$1.00

Reveals the possibilities of developing attractive floral displays in the garden through the sole use of woodland natives.

1001 CHRISTMAS FACTS AND FANCIES

By Alfred C. Hottes

CITY AND SUBURBAN GARDENING

By Chesla C. Sherlock
196 pages. 77 illus. \$1.00

A book for those who wish to make the most of moderate space. Years of experience in city and suburban gardening and contacts with thousands of home owners enable the author to write with authority.

ORNAMENTAL DWARF FRUIT TREES

By Eberhard Abjornson
66 pages. 25 sketches \$1.00

Dwarf fruit trees are highly valuable in small gardens. They may be trained to cover bare spaces such as walls, sides of buildings, etc. The author of this book is a skilled grower and tells the home gardener how to raise all kinds of ornamental trees that will bear within a few years.

A LITTLE BOOK OF CLIMBING PLANTS

By Alfred C. Hottes
250 pages. 80 illus. \$2.00
